

BRA Homologation Application of Motorcycle or Engine/Chassis

The procedure for Components / Frames / Engines / A Complete Bike to be Homologated is as follows. Application is made to the BRA committee via a Homologation form being filled out & submitted with as much relevant information as possible. The application is tabled at a BRA Committee meeting & discussed. It is then documented with recommendations to the general membership. Major considerations taken into account are Price, Availability, Performance Advantages / Disadvantages & if it fits the criteria. The application is then discussed with input from the general membership & voted on at the next Committee Meeting. Applications should be sent to:
